

## Backline for Steve'n'Seagulls

- Double bass equipment requests:
  - Double bass with piezo pickup, preferably with an adjustable bridge.
  - Hybrid strings (suitable for playing with fingers and bow).
  - Amplifier. Almost any combo or stack will do, with a minimum of 1x15" speaker (to avoid speaker element breakage).
- Guitar amp equipment requests:
  - Tube amplifier, for example Fender Vibrolux, Vox AC 30. The point is to play with pretty clean sounds so ENGL is not first on the list.
- Drum-set equipment requests:
  - "Club Jordan" or other cocktail kit. Otherwise quality drum-set with BD, FloorTom and Snaredrum.
  - Drum chair, bassdrum pedal, carpet.
- Keyboard equipment requests:
  - One lousy keyboard. The soundbank of the keyboard should be horrible for example Casio from the 90'.
  - keyboard stand

Please let me know if there is any obscurity on this technical raider.

Together we will find a way for a successful gig.
